

On May 2, 2007, the Domestic Policy Subcommittee began an investigation into the adequacy of access to dental care for Medicaid beneficiary children in Maryland. After reviewing documentation of UnitedHealth Group Company's (United) dental network and records of claims submitted for services rendered to United beneficiary children in 2006, the Subcommittee has made several troubling findings.

The Subcommittee summarized those findings in a letter to United and Maryland's Department of Health and Mental Hygiene.
